

GAS PROCESSING & METHANOL COMPLEX PROJECT NO. 11998A

Project	FEED for Gas Gathering Pipelines & Associated Infrastructure
Client	Brass Fertilizer and Petrochemical Company Limited
Originating Company	Epic Atlantic Limited
Document Title	Critical Line List-ELEPA
Document Number	EA-BFPCL-GPMC-GGPL-FEED-MPP-LST-012
Document Revision	R01
Document Status	Issued For Review
Originator	Joseph Obinna
Security Classification	Restricted
Issue Date	1 Aug 2022

Critical Line List-ELEPA

R01	01.08.22	Issued for Review	J. Obinna	E. Nwachukwu	A. Duru	
Rev #	Issue Date	Status Description	Originator	Reviewer	Approver (Epic)	Approver (BFPCL)

Revision History

Rev No.	Date	Description of Revision
R01	1.08.22	Issued for Review

Revision Philosophy:

- a. All documents for review shall be issued at R01, with subsequent R02, R03, etc as required.
- b. All documents approved for issue or approved for design shall be issued at A01 with subsequent A02, A03, etc. as required. (Management of Change is required for A02, A03, etc.).
for the subsequent project phases, post FEED, it is expected that:
- c. All Detailed Design documents for review shall be issued at D01, with subsequent D02, D03, etc. as required.
- d. All documents approved for construction shall be issued at C01 with subsequent C02, C03, etc. as required. (Management of Change is required for C02, C03, etc.)
- e. All approved "As-Built" documents shall be issued at Z01, with subsequent Z02, Z03, etc as required. (Use versions Z01.1, Z01.2, Z01.3, etc to review the "As-Built" document to Z02).

Neither the whole nor any part of this document may be reproduced or distributed in any form or by any means (electronic, mechanical, reprographic, recording, or otherwise) without the prior written consent of the copyright owner.

GENERAL NOTES

1. In accordance with DEP 31.38.01.26-Gen, the following in-plant process lines shall be considered for a comprehensive piping stress analysis using Industry recognised Stress analysis software. Bentley AutoPIPE CONNECT v11.2 will be used.

- Process lines size DN 80 and above (NPS 3 and above) subjected to slug flow or water hammer
- Process lines size of size DN 80 and above (NPS 3 and above) subjected to two phase flow
- Process lines size DN 50 (NPS 2) and above subjected to relief loads;
- Process lines size DN 300 (NPS 12) with design temperatures from 40 °C (100 °F) to 175 °C (350 °F)
- Blowdown and flare header or vent piping, but not atmospheric vent piping
- Lines having substantial concentrated loads such as valves, fittings, unsupported vertical risers and branches
- Pipe size DN 500 (NPS 20) and larger

2. The formal computerised analysis shall provide report in chart methods that provide an evaluation of the forces, moments and stresses caused by displacement strains.

3. The integrity and flexibility of lines that are not on the critical line list ("non-critical") shall be guaranteed and shall be properly supported.

4. All critical lines shall be identified as such on the project line-list.

6. Stress analysis of the main product pipeline section, from pig reciever to pig launcher shall be conducted separately by pipeline discipline When full survey information/Data on the Right of Way (ROW) is available.
